# Downlight Installation Instructions

## ROBOCAN 2.4G Hz Remote Control version

1 Ceiling cutout 200mm.

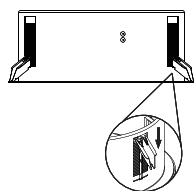

2 Assemble the front trim and the lamp using three screws.

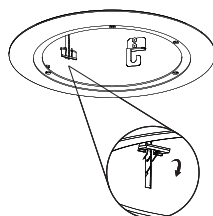

3 Put the clip on the embedded housing.

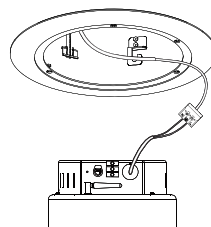

4 Insert embedded housing into the ceiling cutout.

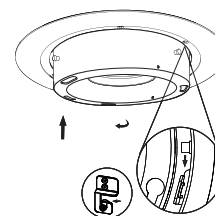

5 Push the clips down against the ceiling.

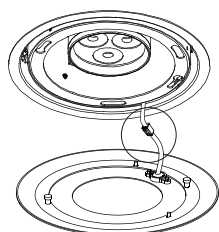

6 Press the snap lock down to fix the lamp in position.

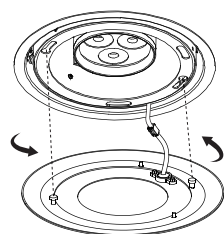

7 Connect the luminaire to the AC power supply.

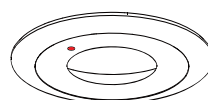

8 Insert the fixture in the embedded housing and twist, making sure the lugs engage fully in the latching slots.

9 Join the fixed trim and the fixture using the connector.

10 Fix the fixed trim onto the fixed trim latch, making sure the lugs engage fully in the latching slots.

11 Restore power supply.
